Navigating Oman's Evolving ESG Landscape

Oman is at a pivotal moment in its sustainability journey. With the launch of the Sustainable Finance Framework and a national commitment to the Sustainable Development Goals (SDGs) and Net Zero targets, the country is accelerating efforts to drive green growth and climate resilience.

The Ministry of Finance's newly launched framework enables access to funding via Green Bonds, Sustainability Bonds, and other financial instruments. These will fuel projects in renewable energy, climate adaptation, and inclusive development—anchored in transparent, auditable, ESG-aligned reporting.

Simultaneously, global mandates like IFRS S1 and S2 are raising the bar for climate and sustainability disclosures. Omani organisations now face a dual challenge: staying compliant while demonstrating impact.

CCR: Your Partner in Streamlining ESG Reporting

At Climate Change Response (CCR), we simplify sustainability through advanced digital tools and expert-driven services, tailored for the Omani context.

Our suite—CSP (CCR Set-Up Platform), CIP (CCR Intelligence Platform), and vCSO (Virtual Chief Sustainability Officer)—ensures sustainability consultants and organisations can navigate new frameworks with ease, accuracy, and confidence.

CCR Set-Up Platform (CSP)

Start Smart: Define Boundaries, Organise Data, Align Globally

The CSP is your launchpad for sustainability reporting. Built for consultants and organisations navigating complex data landscapes, it provides a structured, intelligent foundation.

Precision Boundary Setting

Define operational, organisational control, and value chain boundaries with configurable templates tailored to Oman's reporting needs.

Multi-Source Data Integration

Aggregate and unify data across departments, systems and assets—clarifying sources and streamlining diverse datasets into a unified structure.

Framework Auto-Mapping

Auto-align data to GRI, CDP, ISSB S1/S2, CSRD, SDGs, Oman's national frameworks and more —no manual crosswalks needed.

AI-Driven Classification

Leverage Gen AI to detect, tag, and categorise sustainability data according to disclosure requirements and materiality.

Audit-Ready Logs

Maintain traceability and compliance history for each data point—critical for assurance and verification.

CCR Intelligence Platform (CIP)

From Data to Disclosure: Automate. Analyse. Act.

Once structured and collected, your data flows into the CIP—CCR's powerhouse for real-time analytics, forecasting, and reporting.

What Makes CIP Unique:

Fully Automated ESG Reporting:

Generate reports at the click of a button, tailored for regulators, investors, and boards.

Integrated Data Management:

Prioritise what matters with AI-backed stakeholder and impact materiality assessments.

Scenario Modelling & Risk Analysis:

Forecast emissions, climate impacts, and regulatory risks under various policy or growth pathways.

Conversational AI Assistant:

Ask natural-language questions (e.g., What are our top 3 emissions hotspots?) and get actionable insights in seconds.

Dashboards for Everyone:

Track ESG metrics across customisable dashboards segmented for sustainability teams, C-suites, and project managers.

Compliance Intelligence:

Receive proactive alerts on misaligned data, compliance risks, emission hotspots and other anomalies.

Portfolio & Sector Views:

Export reports in tailored formats for government, investors, consultants, or internal departments.

Virtual Chief Sustainability Officer (vCSO)

Leadership Without Overhead. Expertise On Tap.

CCR's vCSO service provides instant access to senior-level sustainability leadership—ideal for Omani organisations building capacity or consultants advising multiple clients.

Strategy Design & Roadmapping

Build net-zero plans, ESG strategy documents, climate adaptation pathways, and transition risk assessments.

Regulatory Readiness

Stay ahead of local (e.g., Oman's Sustainable Finance Framework) and global frameworks.

Boardroom & Stakeholder Engagement

Back strategic decisions with expert insights, impact assessments, and tailored presentations.

Continuous Monitoring & Adjustments

Keep your ESG strategy alive with ongoing checks, recalibration, and performance tracking.

Integrated with CSP + CIP

The vCSO service draws from real-time platform data—providing context-rich, evidence-backed advice.

Why CCR?

Built for Compliance

From Oman's Sustainable Finance Framework to ISSB and GRI—we help you stay aligned, always.

Eliminate Manual Efforts

Save time with AI-powered automation across data processing, reporting, and monitoring.

Scalable, Secure, & Cloud-Based

Multi-user platform with advanced access control—suitable for consultants, corporates, and institutions.

Investor Confidence Ready

Generate investor-grade reports with auditable, consistent sustainability metrics.

Local Expertise + Global Standards

Combine deep regional insights with global best practices in ESG and climate reporting.

Driving Sustainable Investment in Oman

As Oman opens the gates to sustainable capital markets, transparent ESG reporting becomes a strategic advantage. Global investment firms, managing trillions in ESG-aligned portfolios, now require high-quality sustainability disclosures. CCR's digital platforms position consultants and organisations to attract green finance by delivering reliable, investor-ready sustainability data.

Let's Build Oman's Sustainable Future Together

CCR empowers sustainability professionals to be the catalysts of Oman's green transition. Whether you're supporting public sector projects or advising businesses, our platforms and services enable you to deliver clarity, compliance, and impact—faster.
