The Smarter Way to Align with UAE Sustainability Frameworks

With increasing regulatory momentum driven by the UAE Sustainable Finance Framework, Net Zero 2050 targets, and mandatory ESG disclosure requirements for listed companies, sustainability consultants and businesses need a smarter, more agile way to navigate reporting obligations.

CCR empowers sustainability consultants and organisations across the UAE with its AI-powered platform suite that automates sustainability reporting, enhances data quality, ensures audit-readiness, and generates actionable insights—so you can spend less time managing data and more time driving impact.

Key Aspects of UAE's Sustainability Reporting Landscape

1

Regulatory-Driven ESG Disclosure

- SCA Decision No. 3/RM/2020 mandates public joint stock companies listed on ADX and DFM to publish annual sustainability reports.
- Supported by ADX and DFM ESG Disclosure Guidelines, aligned with GRI and other global frameworks.
- UAE's Green Agenda 2030 and Sustainable Finance Framework demand robust ESG data governance.

2

UAE Agenda 2071 & Beyond

- Emphasises carbon reduction, renewable energy, air & water quality, and sustainable finance.
- Drives alignment with global standards: GRI, ISSB, SASB, CSRD, CDP, and TCFD.

3

Stakeholder-Driven Demand

- Investors, customers, and regulators are increasingly demanding transparent ESG data.
- Companies must demonstrate real impact and resilience in sustainability strategies.

CCR Set-Up Platform (CSP)

Establish Your ESG Reporting Foundation

CSP defines the what, where, and how of sustainability data—ensuring UAE-aligned readiness from the ground up:

Boundary Definition Engine:

Define reporting boundaries at the organisational, operational, and value-chain level to support full disclosures.

Integrated Multi-Source Data Management :

Seamlessly collect and standardise ESG and operational data across data streams.

Automated Data Mapping & Framework Alignment:

Easily align sustainability data and map KPIs against UAE frameworks, targets and global standards like GRI, ISSB, CSRD, CDP, SASB and more.

GenAI-Powered Structuring:

Use Generative AI to identify data gaps, classify sources and streamline reporting readiness from raw input to structured datasets.

CCR Intelligence Platform (CIP)

Automate Reporting. Gain Predictive Insights. Drive Action.

CIP transforms raw data into meaningful ESG reports, dashboards, and forecasts using cutting-edge technologies:

What Makes CIP Unique:

Automated Report Generation:

Create ready-to-file, regulator-compliant reports in required formats—automatically.

Predictive Modelling & Risk Alerts:

Model emission trends, detect ESG risks, and simulate climate impact scenarios with AI-powered foresight.

Advanced Analytics Dashboards:

Access real-time dashboards to monitor ESG KPIs, carbon hotspots, and sustainability progress.

Generative AI Copilot:

Ask questions like "How can I improve my GHG performance?" for personalized guidance and clear summaries.

Smart Workflow Automation:

Set up alerts, approval flows, and triggers to reduce manual work.

Audit Logs & Role-Based Access:

Maintain full traceability, compliance history, and secure access across teams, clients, and auditors.

No-Code Report Builder:

Tailor reports for regulators, investors, or internal boards without any coding.

vCSO – Virtual Chief Sustainability Officer

Strategic Expertise. On Demand.

CCR's vCSO service equips consultants and businesses with on-demand sustainability leadership, without the cost of full-time hires:

Expert Advisory When You Need It:

Align your strategies with UAE regulations and global ESG best practices.

Data-Backed Decision Support:

Translate analytics into actions using insights from our AI-driven Intelligence Platform.

Audit Ready Support:

Audit support powered by – raw to final data – mapped reports and expert guidance.

Boardroom-Ready Inputs:

Support executive engagement and investor communication with data-led storytelling.

Continuous Compliance Support:

Stay ahead of changing disclosure mandates with ongoing governance and risk monitoring.

Built for UAE Consultants & Their Clients

CCR is designed to serve as the digital backbone for consultants and ESG advisors across the region.

Aligned with all relevant UAE frameworks (Sustainable Finance Framework, Net Zero 2050, ESG Disclosure Rules)

White-labelled dashboards for managing multiple clients

Industry-specific templates for UAE specific sectors

Data staging environment to review inputs before reporting

Cloud-based, scalable & secure with role-based access

Multi-lingual Interface

Why CCR for UAE Sustainability Reporting?

Features

Benefits

End-to-End Automation

Eliminate manual ESG workflows with AI-driven data processing.

Predictive AI

Model emissions and risk trajectories before they occur.

Audit-Ready Reports

Regulator- and investor-grade outputs at the click of a button.

Gen AI & ML Insights

Get contextual recommendations and performance boosters.

No-Code Dashboards

Custom views for teams, executives, and external auditors.

Strategic Advisory (vCSO)

On-demand sustainability leadership for UAE and global frameworks.

Role-Based Security

Enterprise-grade, cloud-native platform for sensitive ESG data.

UAE Framework Integration

Purpose-built dashboards aligning to client needs

Streamlining Sustainability Management

Whether you're an in-house sustainability team or an external consultant, CCR provides everything you need to manage data, automate reports, and accelerate ESG success in line with UAE regulations.
