

Virtual Chief Sustainability Officer

www.ccr.earth

A Partner in Your Sustainability Journey

Expectations of businesses for their ESG performance are increasing. With an emphasis on climate action performance, heightened regulatory and stakeholder scrutiny is being experienced globally. Stock exchanges, financial institutions, regulators & customers are demanding transparent and rigor for organisations to disclose their non-financial aspects, sustainability indicators & risks. Multiple frameworks & standards have been developed globally, but the distinct expertise to simplify material aspects of these expectations is crucial to ensure quality reporting of non-financial indicators.

This level of complexity, coordination, & change require strategic expertise in the form of a Chief Sustainability Officer (CSO). A CSO puts the sustainability perspective into an organisations' operations, providing strategic advice into a material sustainability roadmap with well-established governance, ensuring actions are managed efficiently with the correct outputs, optimal resources & outcomes as desired by organisational stakeholders.

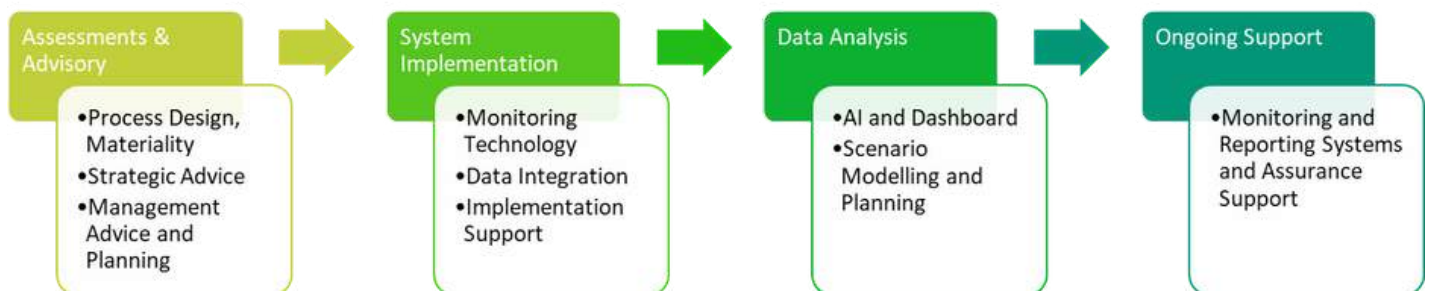

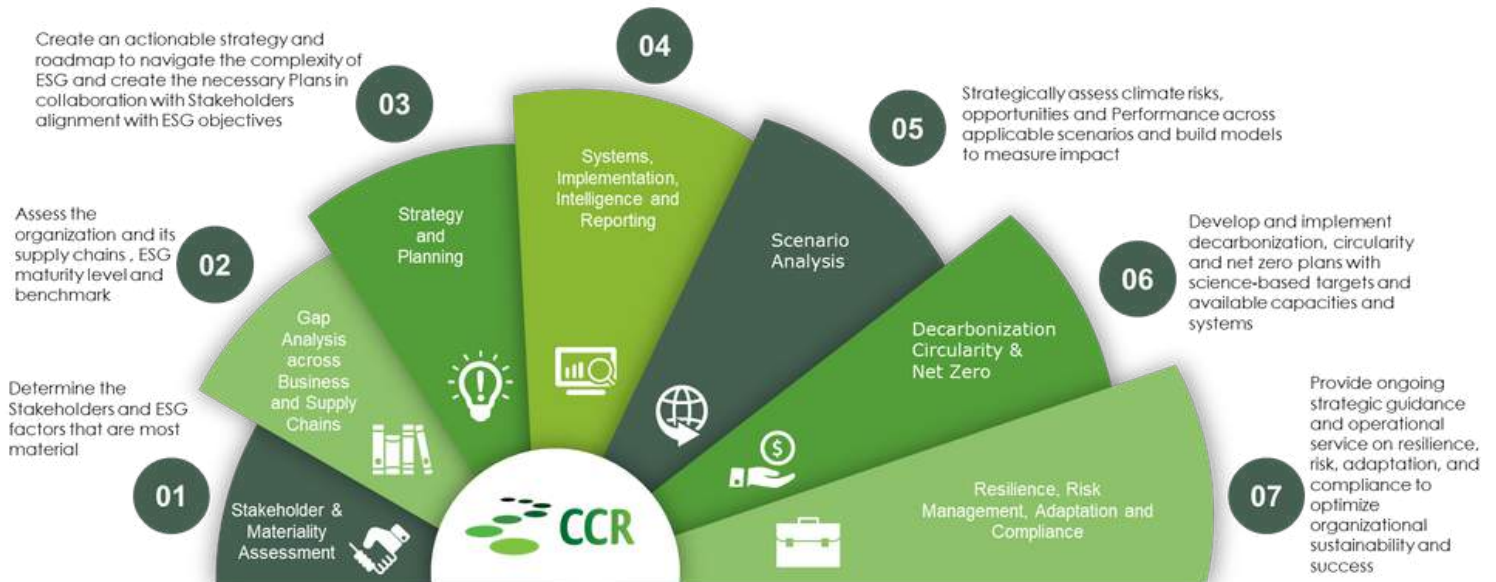

Accelerate Your ESG Journey With CCR

Climate Change Response (CCR) develops partnerships with C-suite executives through a unique virtual CSO offering. We ensure engagement of critical capabilities throughout the decision-making process, representing the board & aligning organisational operations to meet desired ESG objectives across any organisation.

Our Virtual CSOs work just like an embedded CSO executive, strategically guiding your organisation's sustainability journey, translating stakeholder expectations through industry standards into achievable KPIs. CCR's Virtual CSOs will assist in the design of a practical action plan to ensure your organisation's optimal progress of ESG actions & outputs. We help build a culture that ensure activities within your organisation are focused to achieve sustainability targets in today's rapidly evolving regulatory environment.

Our Sustainability Program

To achieve ESG transformation, a strategy must be accompanied by effective implementation, intelligence and systems.
