# Transforming Sustainability Journey

---

Transitioning to a low carbon, sustainable future is good for business. Your investors and consumers will appreciate it and regulators will require it. In the long-run you will achieve significant benefits. These include reduced operating costs and less risk to your operations. The net outcome is greater profitability and organisational value.

Climate Change Response (CCR) can help you achieve your sustainability objectives in a planned and steady manner. CCR has the knowledge, tools and most importantly, the experience to help your organisation achieve its objectives. This brochure outlines the services and benefits of engaging CCR to help your organization achieve its sustainability goals.

Established in 2009 by Dr Om Dubey, the company has expanded in its services to achieve sustainable practices in a variety of industries. Your organisation can now benefit from the expertise and knowledge of our team. Contact us now to have a discussion about your situation.

*"Innovation and digital transformation are critical for rapid, scientific and steady progress towards a sustainable future."*

-Dr. Om Dubey, CEO

# Our Approach

We are a client-focused professional services company that provides sustainable solutions to your energy, process, and emissions challenges.

We are a small but diverse team of highly experienced people that share a common belief in science, technology, and sustainability.

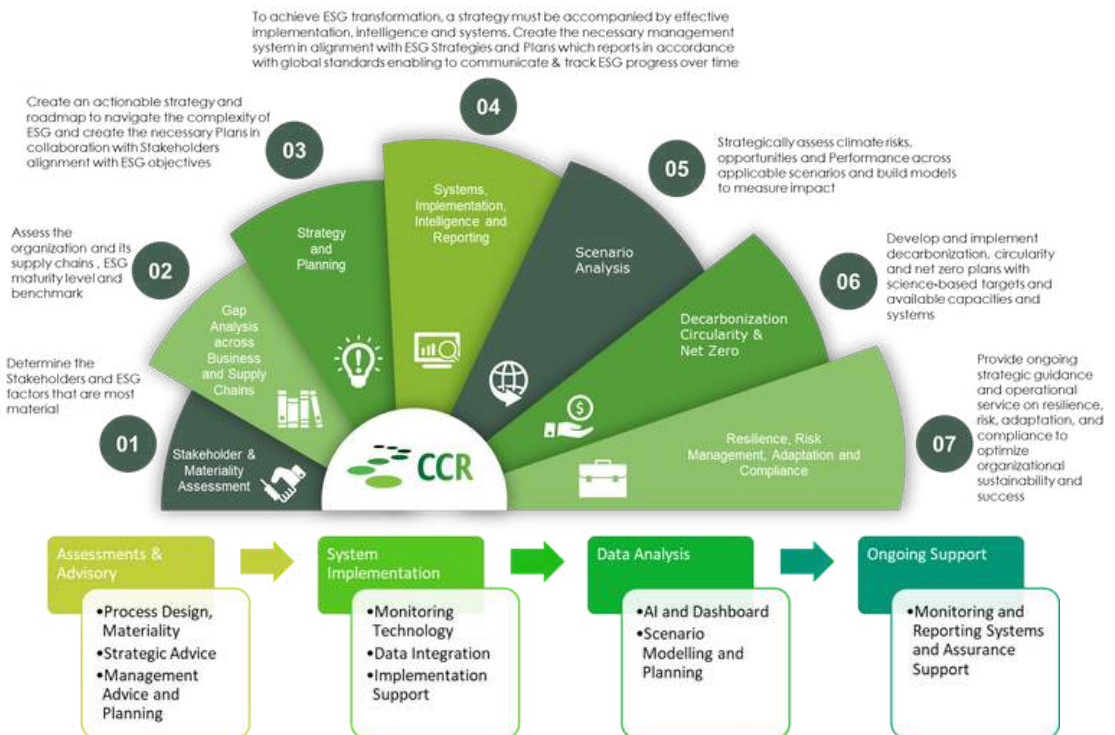

People will always be CCR's most valued asset. We believe in attracting the best people and inspiring them to fulfill their potential both at work and in life because that is better for our business and yours.

Our multidisciplinary technical and business advisors are empowered with decades of industry experience to integrate sustainability to drive innovation value for our clients.

**CCR helps organisations build capacity to manage their energy, waste and social impacts.**

**We design innovative and customised solutions to meet specific business needs.**

**Our Smart Energy and Emissions Management (SEEM) system enables organisations to manage their energy and Scope 1, 2 and 3 emissions in real time.**

---

## Our Vision

CCR thrives on developing leading-edge solutions and services to achieve sustainability and action on climate change for the benefit of the local community and the world.

Our approach is to help partner with individual organisations who have a desire to contribute to a better world by reducing their consumption of fossil fuels while achieving business benefits such as reduced operating costs and risk management.

### CCR achieves its vision by:

Providing systems and strategies that drive sustainable outcomes, such as reducing carbon emissions, and addressing climate change.

Supporting the communities in which we operate with our efforts and knowledge and technical resources.

Transferring information and knowledge about sustainability practices to the community in variety of ways.

Conducting research into systems and tools that will make sustainability practices more efficient and a less costly.

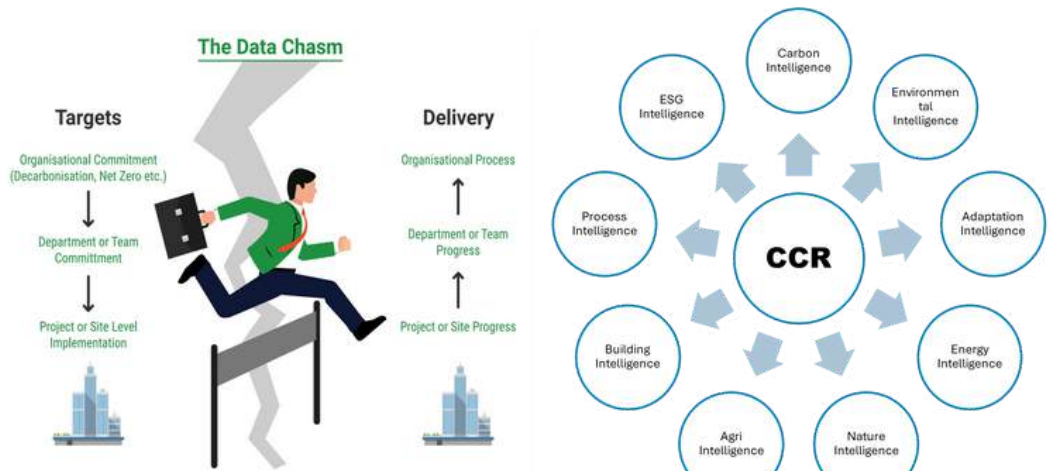

## Our Values

The CCR Team has several attributes that support our clients in their progress towards sustainability. These attributes have evolved over many years of effort and experience working in a variety of industries and countries. They include:

- **Customised approach:** We make the extra effort to get to know our clients and their business needs in detail. This enables a more tailored solution being provided to them.
  - **Cost-effectiveness:** We provide appropriate and cost-effective services that our clients require, without unnecessary features or trying to lock them into proprietary systems, or up-selling services they don't need.
  - **Technical depth :** Our team members are technologists by training including engineers, scientists and chartered accountants who have experience applying their skills in a variety of settings and highly experienced with a strong business systems acumen.
  - **Flexibility and focus:** We add value to any organisation by being flexible in our approach to meeting individual organisational needs. We focus on what is important to the client.
